

Are medical device distributors maximizing their efficiencies?

Posted by Nurse Assist on Aug 6, 2018 | 0 comments

The continued uncertainty and risk the healthcare industry will face in 2018 will motivate healthcare organizations to boost their efficiency across functions. Medical Device Distributors have not only been tasked with finding thousands of products, but now must find manufacturers that are capable of manufacturing more than one type/style of product to boost productivity and help reduce costing in this competitive market.

Nurse Assist, Inc. built its business based on our customer needs. While we were founded on fall management devices, we have evolved into a multiple category manufacturer per our clients' needs. The product lines offered by Nurse Assist, Inc. are: Saline Wound Flush, Saline and Water for irrigation, Prefilled Syringes (Saline, Water & Lube Jelly), Fall Management Systems/Devices, Enteral Feeding Syringes, Urology Syringes Kits & Trays, Monopolar & Bipolar electrosurgical cables, Tracheostomy Holders and Care Kits, Ear ulcer Syringes, & Bulk Products. We found that our "Value with Volume Program" has been the key difference in our distributors winning big business.

If you would like to explore all the product lines Nurse Assist has to offer, please contact us at sales@nurseassist.com

Thank you.
